30lb Base for Channelizer Cone - X8215

Key Features:

- 30 lb. Rectangular rubber base ideal for roof warning line systems in windy or elevated areas.
- Made of 100% post-consumer recycled tire rubber from used car and truck tires.
- Rubber Bases composite construction offers strength and durability.

Our 30lb Base for Channelizer Cone adds dependable stability against wind, traffic drafts, and minor impacts. It slides over the cone stem for a quick, tool-free setup and nests flat for efficient storage. The heavy-duty rubber construction resists cracking and provides years of reliable use.
